Medicaid Services

Investment Part Code: 01

Investment Category: 00 - Agency Investments

1. Name of this Investment: CMS Beneficiary Enrollment and Plan Payment for Part C & D

2. Unique Investment Identifier (UII): 009-000004261

Section B: Investment Detail

1. Provide a brief summary of the investment, including a brief description of the related benefit to the mission delivery and management support areas, and the primary beneficiary(ies) of the investment. Include an explanation of any dependencies between this investment and other investments.

This investment funds ongoing operations and maintenance of the Medicare Advantage Prescription Drug (MARx) and Premium Withhold Systems (PWS) that deliver Enrollment and Healthplan Payment for Part C (Medicare Advantage) and Part D (Medicare Prescription Drug) benefits. The systems process transactions for over 24 million enrollees from over 700 Part C and D Healthplans. This investment is dependent upon certain demographic and entitlement beneficiary information maintained as part of the CMS Medicare Beneficiary Enrollment Data Management investment. The investment secures the resources needed to operate and maintain these systems within FISMA compliance and within CMS requirements. Resources are allocated to maintain and update, test and monitor the operation of the systems that support the Enrollment and Payment functions, as well as provide related audit and compliance support, program management support and customer service to relevant stakeholders. This is a CMS mission critical investment.

2. How does this investment close in part or in whole any identified performance gap in support of the mission delivery and management support areas? Include an assessment of the program impact if this investment isn't fully funded.

CMS has a critical reliance on support contractors to carry out its mission of providing health insurance coverage for millions or American citizens. Support contractors provide key IT resources and skills to perform software engineering and implementation activities necessary to sustain system operations and maintenance to support CMS' program operations. In addition, support contractors help fill gaps in system operations management and FISMA compliance oversight responsibilities that are not able to be accommodated with limited (and dwindling) Federal staff resources. This investment funds the support contractor resources and systems security compliance activities necessary to manage the execution and oversight of mission critical Medicare systems operations and maintenance functions. Failure to fully fund this investment will put mission critical CMS systems at high risk in several areas, including potentially defaulting on contract obligations, as well as the inability to maintain system certification and authority to operate in compliance with FISMA requirements.

3. Provide a list of this investment's accomplishments in the prior year (PY), including projects or useful components/project segments completed, new functionality added, or operational efficiency achieved.

Systems operated within FISMA compliance and CMS requirements, supporting the business functions for Enrollment and Healthplan Payment for Part C (Medicare Advantage) and Part D (Medicare Prescription Drug) benefits.

4. Provide a list of planned accomplishments for current year (CY) and budget year (BY).

Systems operating within FISMA compliance and CMS requirements, supporting the business functions for Enrollment and Healthplan Payment for Part C (Medicare Advantage) and Part D (Medicare Prescription Drug) benefits.

5. Provide the date of the Charter establishing the required Integrated Program Team (IPT) for this investment. An IPT must always include, but is not limited to: a qualified fully-dedicated IT program manager, a contract specialist, an information technology specialist, a security specialist and a business process owner before OMB will approve this program investment budget. IT Program Manager, Business Process Owner and Contract Specialist must be Government Employees.

2. If the funding levels have changed from the FY 2012 President's Budget request for PY or CY, briefly explain those changes:

This investment has gone through the CPIC process. Changes in funding levels reflect changes in Agency priorities. Also, this investment formerly included the Risk Adjustment Suite of Systems. As of FY 2012, that work is being reported in a new investment, CMS Risk Adjustment Data Collection.
